## • Skills

Grafana

Micro-services

Microsoft SQL Server

MySQL

Troubleshooting

Technical Support

Xcode (iOS)

Adobe Photoshop

I plan to pursue my career as Programmer in one of the best top company in the world like Amazon, Google, etc. I need to improve my skills and knowledge in Computer Science area specially in Computer Vision in the best University outside Indonesia. I realized as a undergraduate student, I would have an opportunities to help my own country to move forward and develop in Technology specially in Artificial Intelligence. Detail-Oriented and Quick Learner with 5 Years Experiences on Application Engineer and 2 Years on Software Quality Engineer Software Engineer (Mobile/Web), with 5 year of experience in Software Engineer (Back End using Java and Microservices, Front End using React Js and React Native) also with 2 years experience in Software Quality Engineer field. My current role as Software Engineer, my deep understanding of frontend systems, including linting, deploying via pipelines, testing, and fast debugging, allows me to deliver effective solutions. Most importantly, I prioritize writing clean, easy-to-read code that ensures maintainability and clarity. Rumor has it that I excel in communication and collaboration within the team, as reflected in the positive feedback from my 360-degree KPI assessments conducted by all team members.

## • Work History

2022-12 -

Current
